

Value of Health Centers TODAY

XYZ PCA

Prepared by:

CAPITAL LINK

www.caplink.org

Federally Qualified Health Centers (FQHCs) and other safety-net clinics are locally-controlled, non-profit organizations that offer a range of quality services, including primary care, behavioral health, dental and vision. In 2015, (XYZ) state health centers contributed **\$150 million in total economic impact** and **over 1,500 jobs**. These health centers served **24% of the Medicaid population**, but providing this care only comprised **3% of total Medicaid expenditures**.

Value of Health Centers TOMORROW?

XYZ PCA

If Congress and the new President agree to **roll back Medicaid eligibility** to pre-Affordable Care Act levels, **eliminate subsidies for insurance plans** offered through the exchanges, and **reduce health centers' federal operating support by 70%**, the health center of tomorrow will look dramatically different than it does today. Health centers would rapidly destabilize financially, with cascading negative impacts to employees, patients, and the communities they serve. XYZ PCA would experience a **\$20 million economic reduction** and a **loss of 1,000 jobs**.

Potential future impacts specific to XYZ PCA (or Congressional District) health centers are highlighted below.
